BRIEF SUMMARY

I'm passionate about turning creative ideas into visually stunning websites, with expertise in front-end development and a growing interest in back-end development. Coding is my jam, and I love using C++, JavaScript and Python to build digital solutions that bridge the gap between the digital and real worlds.

Outside of my studies, you can find me collaborating with friends on projects and hackathons, where we tackle fast-paced tech challenges to create smart solutions. I'm also deeply fascinated by the potential of AI and Machine Learning to revolutionize industries, and I'm eager to explore their possibilities.
